

Courseware & Tools for Digital Learning

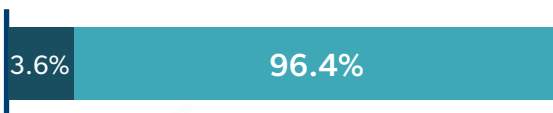

every learner
everywhere

Building instructor capacity for discovery, implementation, and improved use of digital learning courseware and tools.

Today most higher education institutions understand the power and promise of digital learning, especially in gateway courses and for Black, Latinx, Indigenous, and poverty-affected students. What's difficult is getting started, choosing the right digital learning products to meet student and faculty needs, and implementing courseware with fidelity to the technology tools and the diverse education contexts of an institution.

Overview

Courseware and Tools for Digital Learning guides academic leaders, faculty, and instructional support staff in discovering and comparing digital learning products, integrating courseware into teaching practice effectively, and using research and assessment to continuously improve instruction over time.

Strongly Disagree/Disagree

Strongly Agree/Agree

Among instructors surveyed in Fall 2020, nearly all believed that the adaptive courseware helped them improve student learning, better monitor progress, and hold individual students accountable.

Courseware & Tools for Digital Learning

Approach

We support institutional transformation focused on improving course outcomes for racially-minoritized and poverty-affected students using digital learning courseware and tools.

Outcomes

- **Discover** how high-quality digital learning can address institutional challenges related to course and degree completion, consider the range of courseware and tools available in the market today, and learn how these technologies can benefit both students and instructors.
- **Understand** the foundational components needed to teach effectively with courseware including equity-minded practice, tool integration and alignment, actionable learning analytics, and a comprehensive approach to support for students using courseware.
- **Review** the key considerations and resources available for digital learning technology selection and implementation including efficacy, equity, functionality, and student and instructor needs. Plan for the redesign of one or more courses using courseware.
- **Implement** high-quality digital learning technologies while placing the needs of Black, Latinx, Indigenous, poverty-affected, and first-generation college students at the center of the learning experience. Adopt continuous improvement approaches to support iteration on redesigned courses and scale courseware use across departments and programs.

Audience

Institution Leaders, Academic Leaders, Faculty, Information Technology and Instructional Support Staff

Format and Duration

Online and onsite events delivered over 12-18 months

Every Learner Everywhere is a network of twelve partner organizations with expertise in evaluating, implementing, scaling, and measuring the efficacy of education technologies, curriculum and course design strategies, teaching practices, and support services that personalize instruction for students in blended and online learning environments.
